OUR FLORIDA CORRESPONDENCE. From Anderson to Florida Through the dent to the Trip.

TAMPA, FLA., Dec. 21, 1878.

Editor Anderson Intelligencer : I thought when I commenced an ac count of my trip to this Land of Flowers, preparatory to giving a description of the country, which I had promised some of your readers, I would have been long ago through, but settling in a new country one finds so much to do there is but little time for writing. My last letter left me within two miles of Stockton, Ga., at Mr. Gould's, where we were kindly accommodated during Sabbath until Monday morning, and as we expect sometime to-day (March 4th) to reach the Florida border, we feel as though we were nearing our destination, and are proportionately encouraged. There is a charm about the word home, always attended by its magnet, which ever attracts us with gladdened hearts, and however saddened may be our thoughts by past reminiscences of friends and kindred ties, severed and left behind us, even though it be an adopted home it is significant of rest; and what balm is there so soothing to the tired and weary heart? Yet with all towards Carolina, the State of our nativity, and Anderson, the place of our births, (for we were all born within the County,) our affections can never be lessened, and our eyes will ever turn with interest! To-day we travel without accident or

ence to my opinions touching such mat-ters, I think the views I entertain and interruption about twenty-eight miles, and stop with Mr. Philip Lee, a very kind and clever old gentleman, who cordially welcomes us to his "ingle side," which we find quite comfortable, for though Mr. L. informs us that we crossed the line into Florida some three or four miles back, the chilly air does not admonish us that we are much nearer the

journeys from day to day, the country for miles back differing little in appearance, sparsely settled, and generally along the roads barren and sandy, presenting the usual character of the lands as one nears the sea coast. Mr. Lee informs us, however, that the pine lands in Florida produce much better than their appearance would indicate; but of this I will be able to say more and judge better from experience after a while. Certainly in Carolina such looking land would be regarded almost worthless. count of his locality, without regard to his political views or character. I have

Leaving Mr. Lee's on the morning of the 5th, we pass through Jasper, a small village on the railroad, in Hamilton County, stopping only a short while to have some iron repaired on my one-horse wagon, and to get some directions to "White Springs," where we expect to camp to-night. To-day we see oranges growing for the first time, and the children are in perfect ecstacies over them. I give a dime and permission is given them to get as many as they want. Edgar soon has his pocket and both hands any more. Poor child, he doesn't know the disappointment in store for him. The fruit is very beautiful on the trees, but the oranges are sour and bitter sweets, and only luscious in appearance. This reconciles my little boy, satisfying, and I hope, making him ashamed of, his

We pass a churchyard about two miles before reaching the Springs, which is indeed a lovely spot, but full of awe and solemuity with its surrounding water oaks covered with long-drooping moss, mourning, as it were, for the dead sleeping beneath their shades.

"Perhaps in this sequestered spot is laid Some one once pregnant with Celestial fire. Hands that the rod of Empire might have or waked to ecstacy the living Lyre."

White Springs, where we stop to-night though deserted at this season of the year, I am told is still a place of resort in the Summer for invalids, as well as pleasure seekers. There is a large hotel for the accommodation of visitors, two stores and quite a number of houses erected, all of which, I am told, are occupied during the Summer, but are vacant now, giving the place the appearance of a "deserted village." Through the kindness of Mr. Adams, who is selling goods there for the accommodation of the neighborhood and those resident permaneutly in the place, we are allowed to occupy a comfortable school room, with good fireplace and situated quite near the Springs. This is quite to our taste, and enables us in our hurry through to step down and view the Springs without delay in our journey. The strong sulphurous smell of the water-compared by the boys to "gunpowder"-readily suggests the properties of the water. It is situated on the right bank of the Suwannee river, and I expect, when not overflowed, has a high temperature, as the water is very warm now, though completely over-

- Many a young man is very agreea ble in social parties, but can't do much more than support himself. For a girl fled by the River, which is much swollen by the heavy rains. A very to marry such a fellow is taking great large building has been built immediateisks. To marry a man who has nothing but a salaried situation is imprudent ly over the Springs with steps leading Better wait until by economy he has something to begin married life on. If he really loves he can wait a while, and down into the water, several bath rooms partitioned off for accommodation of those desiring to bathe, with other conif he has a manly nature he can restrict veniences. Altogether, I think White himself of some enjoyments so as to save noncy to begin matrimonial life with. Springs a very pretty place, and, though f he won't do that he is selfish, and not deserted now, gay enough in Summer. likely to make a good husband. If he can't, then certainly expecting his salary

On the morning of the 6th we move off in the direction of Lake City, in Columbia County, which place we pass about twelve o'clock. This little town has about fifteen hundred inhabitants, and presents quite a business appearance. Carts with fruits and vegetables are coming in, and pedestrians hurrying along through the streets, make it look more like a live town than any place we've passed since leaving Anderson. There is a lake on either side of it, from which it derives its name, and which renders it very picturesque in appearance; and we a beautiful place. Lake City affords one flavor in their cakes, puddings and pastry, of the great necessities of Florida: a will get it by using Dr. Price's Extracts.

BY E. B. MURRAY & CO.

ment to Northern markets for fruits, veg-

It is quite a sight to us all to see so

many green peas growing-fields with

acres in green peas. I am told over

shipped from Lake City last season.

Leaving this thrifty-looking little town,

we move on towards Newnansville, which

O. Quinn, who lives eleven miles from

town, and who informs us that houses are

few and far betwen along the road. Mr.

Quinn is a young man but a good farmer.

Has three cribs full of corn, several hun-

dred bushels of potatoes to sell; rice,

sugar, syrup, everything he uses he raises

imself, except coffee and flour. This is

Interesting Interview of Governor Simp-

son by the Correspondent of the Cin-

Correspondent-Governor, in view of

sible influence arising therewith, it has

and political preferences finding accept-

called to know your Excellency's views

touching certain questions of interest to

Governor-I am quite willing that you

should know my individual views touch-ing matters of public policy, and though not elected to office with particular refer-

hold are in common with my fellow-citi-

Cor.-Who do you prefer for President,

Gov.-I prefer Senator Bayard for

President over any man in the United

States,. He is pure in character— which is the first and most important

system of government of any of our pub

lic men, and his integrity of character would not allow him to deviate from that

Bayard I would prefer Hendricks or Thurman. Not because they are from

a higher opinion of the masses than this, and I don't think we should pander to

this idea. If there seemed to be any chance for Hancock I would prefer

him next to Bayard. I don't know any

man in the East suitable for the place.

Cor.-What are your views about hard

Gov .- As a citizen I am a hard money

question of confining the general govern-ment to its constitutional orbit. That is

fact, the very existence of the govern-ment of our fathers depends on it—and

where a man is sound on that, this cov-

mere legislation. We had better decide

the question whether we shall have the

ight to legislate before we fall out about

rhat measurees we shall adopt.

Cor.—What do you say as to the solid

Gov .- As to the solid South? That

matter is perverted. The South is not solid as a section against the North as a

section. The people of the several Southern States are solid in the belief

justly dealt with by the Republican par-

ty, since the war, in overthrowing our

overnments, and putting us under the

heel of ignorance, corruption and inca-pacity. They are solid in the belief that the only rescue from this state of things

is the restoration in each State of integri

ty with competency, and as these quali

es were found aloue in the Democratic

party of these States, that that party should

be placed in power; and inasmuch as the danger to this came from the general

government transcending its constitution

al powers and interfering with the inter-

too, in the belief that that government

ught to be confined to its constitution

boundary, and they are surprised that the

people of the Northern States are not solid on the same line, because this is no sec-

tional question, but it is a question which

lies among the foundation stones of the

Cor .- Do you think that the Democratic

party South ought to demand a place on the national ticket in 1880?

Democrats ought to demand a place on

the national ticket as a sine que non-cer tainly not on the ground of locality. No

Ve don't care anything about office. No

## God-His Existence.

ship of all his intelligent creatures. If there is no Supreme Being, then what is called religion is a vanity. Such Bereflecting mind, that so much is involved in this question that it is by far the most important inquiry that can be presented to us. By far the greater number of the numan family believe there is a God and render to him some sort of adoration case and, perhaps, always will be so. In all ages there have been a few individuals who have, in words, at least, denied the existence of a God. Such persons are called atheists. Practical atheists always have been numerous and practical athe-ism common. It has been the prevailing opinion that those who say they are atheists are not, in fact, what they say

the orange will not bear. Wheat will not reproduce itself in equatorial regions. It is manifest that the animals and vegetables are adapted to the places where Manifestations of design are seen in f grass; in the coverings and teeth of animals, and the very structure of the earth itself. If there is evidence of de-

of that State, he came across a Frenchman who called himself a doctor. This man advised him to get an ounce of is vain to say that nature designed all it round his neck with a tape, so it would hings, for we may ask what is nature? come at the bottom of the sternum or The harmony which is seen in the uni verse is another proof of a Supreme Be preast bone, and securing it there with ing. This harmony is so great that amongst all the parts which rate in a week or ten days, when he must get another and use it in the same way. two ounces thus used, costing 20 cents, would cure, he declared, the worst case of ague so it would never come back. Kansas man declared that he had tried this remedy in hundreds of cases, obtaining this information I have tried it nany times, with the same results. So simple and harmless a remedy ought to

be in general use .- Prairie Farmer. MRS. SENATOR GORDON.-The Wash-

and had never known it to fail,

ington correspondent of the Chicago Times relates the following: Some people were speaking the other lay of the regularity with which Mrs. Senator Gordon attends the sessions of the Senate, and the keen interest with which she watches the debates. One of the party said that she is so devoted to her usband that she goes with him everywhere. During the war she took her ing him into battle, in fact, sharing all the danger with him. She had an ambulance at her service, and it was in this that she used to follow him. When he was so seriously wounded, she had her am bulance driven right into the battle-field, and had him pulled out from among the dead and wounded and placed in the ambulance and she drove off with him. All of this was done under the heaviest fire, and the cover of the ambulance was pierced with bullet-holes. Some one said to her: "How could you have the nerve to do it?" "Why," replied Mrs. Gordon, "I did not think any more of it than I should of pulling one of my boys out of the fire if he had fallen in."

Dramatis persone,— An exceedingly fat lady putting like a steam engine, and clinging to the arm of wiry gentleman whose face has become very red, either from the unusual exercise or the consciousness that a hun-dred eyes are looking at him with a ha-ha! in each pupil. Naughty boy: "I say, Charlie, pretty small tug to tow her in with that cargo." Allan's Anti-Fat will reduce the weight from two to five pounds per week. It is purely vegetable-nature's own remedy for this diseased condition. Procurable of your druggists.

EXQUISITE ODORS .- The Unique Perperfumes for the handkerchief and toilet. His Floral Riches surpasses in rich, fresh flowery fragrance, any other Colone or Toilet Water. Dr. Price's Pet Rose, Alista Bouquet, and other extracts are

ing. If there is a Supreme Being, then he is entitled to the adoration and wor-

each member of the human family to be saistfied, upon good and reliable evidence, whether there is a God or not. Of those who profess to believe in the existence of a God, many, no doubt, have never investigated the subject. They have simply assented to what others have stated to them. In this they have exhibited The existence of a Supreme Being is a matter of too much importance to be treated so lightly.

That there is . God may be inferred

from the existence of the universe. With regard to the vast universe, a part of which constantly comes under our observation, and a part of which each one of the human family is, it may be remark ed that it either created itself, is selfexistent, or was creat l. It will hardly be claimed that the world created itself If so, we may conclude that at some period it did not exist—it was a nonentity; yet when it was not, it had creative pow-er—a power sufficient to produce itself. Such reasoning is too absurd to be accepted as correct by any sane mind. To say that a thing could create itself, is the same thing as to say that a thing is and is not at the same time.

GRANT, FATHER AND SON .- Royalty the universe always existed, and existed in and of itself, or is self-existent. To s already partly established among us. Hereditary privileges are coming in vogue. A son of Gen. Grant is accorded suppose that the universe is self-existent is to suppose that it possesses one of the ncommunicable attributes of a Supreme Being. If the universe is self-existent to him but for the fact that he is a son of Gen. Grant. Birth giving to him political advantages over American citizens in outside of itself. Self-existence includes absolute independence. This is contra-ry to facts. We see that every portion of In the army Frederick Dent Grant had the universe which comes under our ob-servation is controlled by laws which neialready been rapidly promoted, not on the ground of merit, but owing to the ac-cident of birth. Now he has been grantther originate in it nor reside in it. Ev ery one of us is conscious that we are controlled by laws over which we have no control. These laws do not reside in us; they are lodged in some one outment vessel to India, China and Japan. side of us. We may safely conclude that His place, meanwhile, on Gen. Sheridan's the universe neither made itself nor is eternal in its being. It had a beginning, Here is favoritism—flagrant favoritism—on account of birth. It is akin to an and consequently was, at some period hereditary nobility-a departure in the

then it had a creator, and that creator was God-the Supreme Being. Another proof of the existence of a Supreme Being, is the marks of design which are manifest in all things. No one will deny that there are evidences of in the animal kingdom. Some animals are designed to live on the land; others in the air; others in the water, and some animals are fitted to live either in the water or on the land. The same is true concerning the vegetable kingdom. while others flourish only in temperate latitudes. In those regions

sign, it is clearly evidence of a designer. Who, then, designed all these things! The only satisfactory answer is God. It

the vast whole, there is not the least conflict. This earth on which we live and in whose bosom we are soon to find our long home, has two motions. The one is called the daily and the other the yearly. The daily is its revolution on its wn axis. This takes place every twentyfour hours and produces night and day. The circumference of earth at the equator, is more than twenty-five thousa miles; hence at the equator the earth moves at the rate of more than one thousand miles each hour. Think, for one moment of a locomotive moving at the rate of one thousand miles an hour! This would be more than sixteen miles

per minute. Such a train would be heard by the inhabitants of the whole region through which it would pass. No human being could act as its engineer. But great as is this speed of the earth in its daily motion, what is it when compared with that in its annual revolution round the sun. In every two little boys, one almost a baby, and lived with her husband in camp, followfourth days, the earth makes a circuit round the sun. This annual revolution causes the change of seasons. The distance passed over is six hundred millions of miles! What a distance! The mind can form no clear idea of what it means. Six hundred millions of miles per year, would be at the rate of eighteen mile per second; or sixty-four thousand eight undred miles per hour. This is sufficient to startle us but we need not fear. or astronomers tell us that the earth has not varied in its revolutions the one hundredth part of a second in two thousand years. It has never come in contact with any other portion of the uni verse, nor has any other part come in contact with it. Periect harmony pre-

vails. We neither feel a jar nor The child's little toy-wagon, when rolled over the nursery floor makes more noise than the revolutions of this ponder-

ous earth. manages the earth in its revolutions we Are we not in danger of being dashed into atoms at any moment? If there is no God-no Supreme Being -we are in a perilous condition. - York-ville Enquirer.

most important adulterations to avoid are those which are calculated to injure the "staff of life." Merchants who supply their customers with pure articles like Dr. Price's Cream Baking Powder, retain better patrons, have a large trade, and make more money than those who recommend cheap adulterated powders.
